

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PREFACE.

THE plan presented in this book is the outgrowth of twenty-five years' experience in teaching. The compiler hopes that it may prove of service to some of the multitude in our schools who spell badly, and whom the old methods do not seem to reach.

Many spelling-books contain a great number of words, selected indiscriminately, and spread at random over the page, or arranged according to some vowel sound, or similar termination. The most of these require but little study, and hence the pupil often forms habits of carelessness and inattention, which are ruinous to further progress.

This book contains only such words as require close study and application. The first eighty lessons consist of words in common use, likely to be misspelled; the remaining lessons are more difficult. All these are classified in groups, beginning with the easiest; this arrangement is intended to meet the wants of a closely graded school.

As the pupil learns to spell more by sight than by sound, the words are here printed exactly as they

appear in his every-day reading. Accordingly, all divisions into syllables, and all diacritical and accent marks are omitted. The dictionary, but especially the teacher, should teach pronunciation.

The words are numbered to facilitate written exercises in spelling.

The "geographical names" may be made serviceable, both in the department of spelling and geography.

At the request of many teachers, a collection of SENTENCES FOR ANALYSIS AND PARSING has been added to the book. The first ten lessons consist of easy sentences showing the relation of subject and predicate, and giving modifiers of each. In the eleventh lesson, the relative clause is first introduced, and it is repeated in each of the following pages. The last twelve lessons contain much that is quite difficult.

Almost every line being taken from some well known author, quotation marks are omitted.

TO TEACHERS.

It is recommended that, at the close of each reading exercise, the teacher should require the class to spell many of the words read. This will tend to produce a habit of attention to their form, and, in the primary classes, will be the only spelling-book needed. As the pupil becomes more advanced, he can each day, in addition to the above, take a few words from this book; but no more should be attempted than can be thoroughly learned. Frequent reviews will fix these in his memory, till in time he will have mastered the entire list.

If it is possible, there should be a spelling exercise, by writing from dictation, at least four times a week, which should be followed on the fifth day by an oral review.

After each recitation, it will be well to have the class pronounce the words of the next day's lesson. The teacher should give all needful definitions, and illustrations by sentences, which the pupil should lay up for future use.

By a faithful and persistent use of these means, it is believed that good results can be secured.

The geographical names are of prominent countries, cities, rivers, etc., which the pupil will, in every instance, bound, locate, or describe. This will combine with spelling a profitable review of geography. The practical teacher will readily see the advantage of having the words unclassified.

In some of our best schools it is becoming customary to teach grammar, during the first few months, by the oral method only. It is hoped that the easier SENTENCES FOR ANALYSIS AND PARSING will prove of especial assistance to such, and that more advanced classes may derive benefit from the use of the more difficult lessons, both as a daily study and by way of review.

Who dares do more is none. — *Shakspeare.*

LESSON XXX.

1. He that filches from me my good name,
 Robs me of that which not enriches him,
 And makes me poor indeed. — *Shakspeare.*
2. These as they change, Almighty Father! these
 Are but the varied God. The rolling year
 Is full of Thee. Forth in the pleasing spring
 Thy beauty walks, Thy tenderness and love.
— *Thomson.*
3. Cease then, nor order imperfection name;
 Our proper bliss depends on what we blame.
 Know thy own point: this kind, this due degree
 Of blindness, weakness, Heaven bestows on
 thee. — *Pope.*
4. Few sorrows hath she of her own,
 My hope! my joy! my Genevieve!
 She loves me best whene'er I sing
 The songs that make her grieve. — *Coleridge.*
5. The schools became a scene
 Of solemn farce, where ignorance in stilts,
 His cap well lined with logic not his own,
 With parrot tongue performed the scholar's
 part;
 Proceeding soon a graduated dunce. — *Cowper.*
6. He was a man, take him for all in all,
 I shall not look upon his like again.
— *Shakspeare.*
7. Who dainties love, will beggars prove.

LESSON XXXIII.

1. With Thee in shady solitudes I walk,
